Anti-Theft File Protection

Total Privacy and Theft Protection for Valuable Files
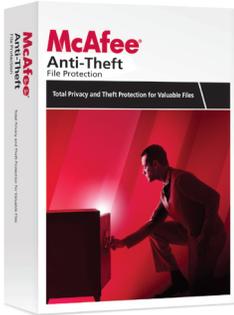

With the growing number of stolen and lost PCs, along with data loss and identity theft cases, it's clear everyone needs extra protection for their personal and confidential files. You need McAfee® Anti-Theft File Protection to secure your valuable files. It is simple to install and uses the industry's leading, innovative technology.

Easy to Use
McAfee Anti-Theft software is fast and easy to install and use, allowing you to quickly secure your files and focus on other activities.

Powerful Protection
Using advanced technology, McAfee helps keep you a step ahead of ever-evolving threats, helping ensure that you have the best protection possible.

The Trusted Security Provider
McAfee has been the leading computer security company for nearly 20 years. We are dedicated to protecting you and your computer from threats so you can get the most out of your PC and the Internet without having to worry.

Simplified Security
You can easily secure your financial documents, tax records and other important files in password-protected "digital vaults." You can reset your password in case you forget it.

McAfee Anti-Theft security provides easy-to-use protection for your financial documents and other important files at home or work against thieves and hackers. It also allows you to keep sensitive files private even if you share a PC. Using powerful advanced technology, it lets you secure files in password protected vaults.

McAfee Anti-Theft protection enables you to securely transfer files using an USB drive. It works with all major PC security software and provides you with an additional layer of protection, helping protect your privacy, your identity, and your finances.
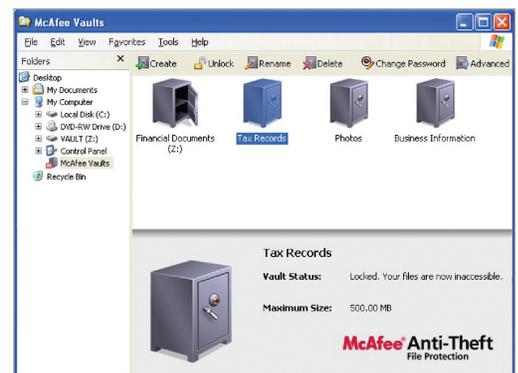

Product Features & Benefits

- **Secure your files using strong file encryption** —256-bit Advanced Encryption Standard (AES) technology protects your personal documents and identity against thieves and hackers

- **Easily transfer and hide files**—Move files into a vault and keep them private even if you share the computer with others

- **Create multiple vaults on your PC and USB drive**—Set up as many secure areas as you want, so every user can have their own private space

- **Password protect your vault**—Create a password for your vault and use the password reset option if needed

- **Extra protection**—Provides an additional layer of protection over your basic PC security

- **Use with other computer security software**[1]— A great addition to your current PC security software

The McAfee Advantage

McAfee's security products use award-winning technology, are easy to install, and come with unlimited email and chat assistance. With continuous and automatic updates, McAfee helps ensure that you always have the best protection to combat the ever-evolving threats.

[1] *McAfee Anti-Theft File Protection works independently of other PC security software but is not guaranteed to be compatible with future versions of other PC security software.*

Note: An Internet connection is required for installation and activation of this security software.

What You Want to Do	How McAfee Makes It Possible
