

McAfee All Access 2013—Household

Unlimited* protection for all the devices in your household

Your world is dramatically different today than it was five years ago. It's a digital life where your devices are always connected and accessible. The explosion of mobile devices and reliance on the Internet has delivered productivity and flexibility gains that have never before been realized. However, it has also given hackers, scammers, and cyberbullies unprecedented opportunities to target your personal data and identity. Rarely does a day go by without a new, high-profile malware or exploit that targets smartphones, tablets, PCs, or Macs making headlines.

All Your Devices. All Your Stuff. All Protected.

McAfee rises to the challenge by enabling you to safely surf, shop, network, and interact online with award-winning McAfee® All Access. Today, most security products only protect a particular type of computer or device, which means you end up spending precious time and money on products that only partially address your needs. McAfee All Access is a single solution that provides comprehensive protection for your PC, Macs, smartphones, and tablets. It delivers complete security that allows you to apply the protection you need to all the devices you own and safeguard them wherever you connect. It's the ultimate way to protect your digital lifestyle and enjoy peace of mind.

Connect with Confidence

Award-winning McAfee All Access enables you to safely connect, surf, and socialize online, knowing that your computer, laptop, netbook, smartphone, and tablet are safe from malicious websites, hackers, scammers, cyberbullies, and identity thieves. You can track, lock, or remotely wipe your missing smartphone or tablet and keep your children safe from online predators or explicit content. The comprehensive protection of McAfee All Access lets you connect with confidence and enjoy the convenience your digital lifestyle offers.

What makes McAfee All Access truly unique is that it allows you to centrally manage the security and protection on all devices in your household. It also gives you the ultimate flexibility to quickly and easily optimize protection for all devices as you add new devices or change security settings on existing devices from the cloud-based console.
