 512 MB RAM for XP
 2 GB RAM for Vista and Windows 7
 500 MB free drive space
 1 GHz processor

Internet Connection Required

High-speed connection recommended

Fend Off Viruses and Malware

NEW High-performance scanning engine—

We built our next-generation scanning engine to guard your PC from the latest viruses, Trojans, spyware, rootkits, and other threats, all without seriously compromising battery life or slowing your PC down.

ENHANCED Safe searching and shopping—

With color-coded icons next to every search result, including popular social networking sites, you'll know if the site you're about to visit is safe.

ENHANCED Digital data message—including the location of the blocked IP address and what makes the connection unsafe.

NEW Home screen—

Got a touch-friendly device? Our new home screen is built with your fingers in mind. And it still works great with a track pad or mouse, so navigating to common security tasks is a breeze—on any device.

ENHANCED Security reports—

We've redesigned the security report to bring you the information you need in visually interesting ways. The new report includes relevant images and links for an easier-to-understand snapshot of what's going on in the world of security.

NEW Vulnerability scanner—

If your OS and programs are out of date, you could be vulnerable to threats. The new vulnerability scanner checks your PC for missing updates, and then recommends solutions to keep you safe.

NEW Malicious ads and popup protection—

Websites don't always have control over the ads they display. Sometimes, you might find a risky ad on a site you trust every day. McAfee automatically blocks suspect malicious ads to keep you protected.
