

McAfee® VirusScan® USB

Proven Security that Protects Your USB Drive Against Viruses

With the convenience of USB drives comes a whole range of new security threats that can endanger your data, your identity and your PC.

Whether you use your USB drive simply to share music and photos with friends and family, transfer data between work and home PCs, or use it as a mobile computing platform, you need to know that your files and identity are safe. For these reasons, it is essential to have antivirus protection for your USB drive.

Trusted protection for your U3-enabled USB drive, McAfee VirusScan USB detects and removes viruses and Trojans that can delete important files and data from your USB drive. VirusScan USB leverages McAfee VirusScan's award-winning threat-prevention technology and ensures that your USB drive does not transmit viruses when plugging into PCs.

Relax knowing that with McAfee, you always have the most up-to-date protection for your USB device.

Protects Your USB Drive and Important Files

VirusScan USB keeps your USB drive healthy but also provides on-insertion and on-demand anti-virus protection for your important files, photos and other important data stored on your USB drive. It not only protects your drive, but helps prevent other PCs from being infected.

Stops Viruses. Automatically blocks, cleans and removes viruses and Trojans from your USB drive.

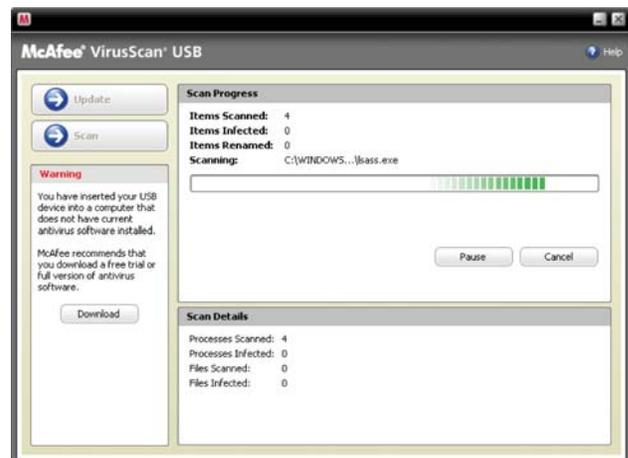

Protects PCs. Helps prevent your U3 smart drive from acting as a carrier of viruses that can be transmitted when you plug into a PC.

Improves USB Drive Health. With VirusScan USB, you can keep your USB drive healthy and secure, ensuring peak performance for U3 applications.

Active and Advanced Protection

McAfee VirusScan USB provides active and advanced protection for your USB drive and its files, and also scans PCs for current antivirus software. With McAfee's virus security alerts you are automatically notified of potential threats and provided information and instructions on how to clean infections.

Also, VirusScan USB automatically detects and eradicates viruses, using background scans whenever files are changed or added to your USB drive. This ensures that files stored on your USB drive are safe.

Designed For You. VirusScan USB provides active and advanced protection.

One-Click Scan. McAfee VirusScan USB automatically scans your USB drive for viruses. If you would also like to do a manual scan, you can access this feature from the main console of the interface.

One-Click Update. Updates occur automatically whenever you plug in your USB device. You can also perform a manual update by simply clicking the update button available on the main console.

Automatic Updates. Helps protect your U3 smart drive from emerging new threats.

McAfee®

McAfee – Always On, Always Protecting

When you install, you are subscribing to the most up-to-date security software delivered to you by McAfee's patented Security as a Service (SaS™) technology.

Always Upgrading, Always Updating

Threat protection and updates that guard against new threats are delivered to your USB drive continuously from McAfee's world-class research center, McAfee® Avert® Labs. Free software upgrades and enhancements are provided as long as your subscription is active.

Device & File Protection

McAfee VirusScan USB safeguards your USB drive from viruses and Trojans to ensure that your irreplaceable files are safe at all times.

Convenient, Ongoing Protection

McAfee offers renewal options to keep your McAfee protection current.
