

McAfee® VirusScan®

Proven security that protects against viruses and spyware

There are over 130,000 viruses and virus-like threats identified to date. As many as 500 new viruses and Internet threats are discovered every month.

To overcome these threats, today's anti-virus solutions must monitor, detect and eradicate various types of security threats, including viruses, spyware, Trojans, and worms, in real-time. With automated, daily updates, McAfee VirusScan protects you from the latest threats encountered when surfing the Internet, chatting or sharing files.

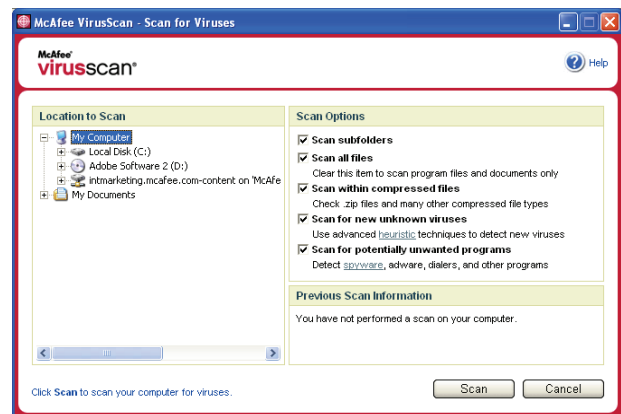

Protect your photos, documents, and financial data

From family photos to tax returns, many of the things you value and need most can be found on your PC. To protect the security of your valuable documents, VirusScan automatically scans and cleans files, e-mails, Internet downloads, and instant message attachments.

- **Always-on protection** identifies and removes viruses, Trojans, worms, and other malicious virus-like applications without interrupting your work.
- **Detection at multiple entry and exit points**, including e-mail, instant message attachments, Internet downloads, and USB drives.
- **Inline cleaning** automatically cleans infections when virus, worm, Trojan, ActiveX control and Java applet threats are detected from.
- **ScriptStopper™ technology** prevents new, script-based threats like the "I Love You" virus.

Remove spyware and unwanted, persistent marketing programs

VirusScan identifies, blocks, and removes potentially unwanted programs (PUPs), such as spyware, Trojans, keyloggers, and dialers, which not only jeopardize your identity, but also reduces PC performance. VirusScan automatically blocks unwanted programs, such as spyware and Trojans, providing options to backup and quarantine or permanently remove.

McAfee VirusScan helps prevent viruses and spyware from damaging or compromising irreplaceable documents.

McAfee VirusScan also protects against unwanted, persistent marketing programs that continuously annoy, interrupt, or subject you to inappropriate or offensive content.

- **Automatic spyware detection** identifies, blocks, and removes unwanted programs that jeopardize your privacy or identity.
- **Automated, daily signature updates** help keep your PC protected from recently discovered virus and spyware threats.
- **PC optimization and revitalization**

Prevent the spread of viruses to friends, family, and co-workers

The thought of having a virus on your PC is bad enough. But in today's connected world, spreading that virus isn't just a concern, it is a reality.

McAfee VirusScan helps prevent the unintentional sending of infected e-mail attachments to friends, family and co-workers.

- **E-mail attachment scanning** scans attachments as they are received or as they are sent.
- **WormStopper™** monitors suspicious mass-mailing behaviors and prevents the spread of viruses to friends, family, and co-workers.
- **24/7, worldwide virus outbreak monitoring** by McAfee's Anti-Virus and Vulnerability Emergency Response Team (AVERT™) - AVERT continually monitors worldwide virus activities and provides immediate anti-virus and anti-spyware protection to VirusScan users.
