Getting started with McAfee All Access

Start getting maximum protection and peace of mind for all your digital devices. Just choose your protection, and then download and install your products on the devices you want to protect.

Choosing your protection from My Account

The My Account page shows your **McAfee All Access** protection products, organized by device type. Click the + icon beside each device type to open the drawer and view the products you can download. For example, to see the products available for a PC, click the + icon beside **PCs**.

For every device you need to protect, log in to My Account at <http://home.mcafee.com> with your McAfee email address and password. Open the drawer for the device, and download and install the products you need. Remember, log in to My Account from a PC to download a PC product, and from a Mac to download a Mac product.

Downloading and installing your PC security

McAfee All Access lets you customize your PC security by offering two types of protection—one that protects your PC from online threats, and one that protects your kids while they're online. For maximum protection, download and install these products on every PC in your household.

Protect your PC

Choose the protection that's just right for each PC in your household:

- 1 From the PC you want to protect, log in to My Account at <http://home.mcafee.com> with your McAfee email address and password.
- 2 Open the PCs drawer by clicking the + icon.
- 3 Choose one of these three options:
 - For a netbook or ultra-portable laptop with limited memory or disk space, download **McAfee AntiVirus Plus**.
 - For an everyday, mid-range PC, download **McAfee Internet Security**.
 - For a high-end desktop or laptop, download **McAfee Total Protection**.
- 4 Follow the on-screen instructions to complete your installation.

Protect your kids

If you have kids using PCs, keep them protected while they surf online and get **McAfee Family Protection**. Complete these steps for each PC your kids use:

- 1 From the PC your kids use, log in to My Account at <http://home.mcafee.com> with your McAfee email address and password.
- 2 Open the **PCs** drawer by clicking the **+** icon.
- 3 Download **McAfee Family Protection**.
- 4 Follow the on-screen instructions to complete your installation.
