

McAfee LiveSafe

You live your digital life. We keep it secure.

A worry-free digital life from one simple service.

Your Devices Protected

- Centrally manage an unlimited* number of PCs**, Macs, smartphones, and tablets
- Locate and track your lost PCs, tablets, and smartphones
- Protect against the latest malware threats like viruses, Trojans, and worms

Your Passwords Secure

- Eliminate password management hassles across accounts and devices with McAfee® LiveSafe SafeKey
- Securely store and access all your user names and passwords using only one password.

Your Data Safe

- Store sensitive data in a McAfee® LiveSafe Personal Locker, an ultra-secure online safety deposit box unlocked with a pin, your face and voice

Making the McAfee LiveSafe service part of your digital lifestyle gets you more: more freedom, more privacy, and more peace of mind. It combines protection for your data, identity, and all your devices into a convenient, innovative security service that is amazingly easy to use.

McAfee LiveSafe secures your digital life with the deepest, most comprehensive protection from McAfee. Since McAfee LiveSafe supports Windows 8, you can use your touch screen to manage security on all your devices.

Your annual subscription covers all the PCs, Macs, smartphones, and tablets that power your digital life. It includes lost device assistance, free support, and advice. It's everything you need to live online safely.

All Your Devices Connect with confidence

Trust McAfee to prevent viruses, malware, spyware, spam—all the bad stuff—from getting onto all your PCs and Macs. Our robust security systems work together to block every trick of malicious software, using real-time antimalware as well as a two-way firewall to frustrate fraudsters, phishers, and hackers.

Secure your smartphones and tablets

Your service includes the leading mobile security solution and you can protect an unlimited number of phones and tablets. If you lose your Android smartphone or tablet, you can track, locate and lock it remotely. Our solution protects your device against viruses and spyware. You can also easily filter out unwanted calls and text messages.

Stop a thief

McAfee LiveSafe service uses Anti-theft technology** to help you lock and locate your lost PC. While you track down your device, your data remains encrypted. When it's back in your hands, you can get back to normal quickly, without having to restore your software, hard drive, or personal data. If you don't find your PC, you can remotely wipe your private data.

Your Identity Simplify password management

Do you use the same 2 or 3 passwords everywhere? How often do you have to reset them? Do you get frustrated remembering complex passwords? We have a solution. McAfee SafeKey securely stores your usernames and passwords for your favorite sites on all your devices. You only need to remember one password—the key that opens your McAfee LiveSafe SafeKey vault. Then McAfee SafeKey can log in to your account with a single click and keep passwords in sync across all your devices. It's safe and simple.

Your Data Protect your privacy

McAfee is delighted to secure your digital assets with voice and facial recognition technology. Sometimes you need fast access to your most sensitive data while away from home. McAfee LiveSafe Personal Locker provides a 1GB ultra-secure online safety deposit box for copies of your financial records, passport, even deeds and trust documents. You can keep your personal stuff private, yet access it from all your devices. Biometric authentication that scans your voice and face ensures that only you can access your files.

A worry-free digital life. One simple service. Great value.

Your Questions Answered

- Get free support via phone, email or chat when you need it
- Consult a trusted security advisor, free
