McAfee Family Protection for Mac

Your children are learning and exploring online. You are keeping them safe.

McAfee® Family Protection is the easiest, most complete way to keep your children safe online. Designed to empower parents to say "yes" to their children's online interests, McAfee Family Protection grows with your children as their Internet activity interests change and mature. With McAfee's advanced features parents have the power to protect their children at any age from inappropriate content.

Children who use the Internet are subject to a number of threats including access to inappropriate content, cyberbullying, posting of personal information, exposure to strangers, and other threats. With McAfee Family Protection for Mac, parents can have the peace of mind that their children are safe to learn, explore, and enjoy the Internet.

The ideal complement to your existing Mac security software, McAfee Family Protection works with all major brands.

Mac

Key Product Highlights

Block social networking sites and IM programs—Ensure children do not become victims of cyberbullying and engage in improper dialogue with strangers

Set time limits—Manage the amount of time your children spend on the Internet

Block objectionable websites—Filter up to 35 categories of inappropriate websites that may be accidentally exposed to children

Review usage reports—View and understand your children's online activities to communicate and educate proper online behaviors

Protects Your Children From:
• Adult content
• Cyberbullying
• Contact with strangers

Reassures Parents With:
• Reporting
• Setting time limits
• Email and text alerting

Key Advantages

Instant text alerts—Receive email and/or text alerts instantly when intentional or accidental access to blocked websites is attempted

Program blocking—Blocks access to programs on the computer that may be inappropriate to children and blocks file sharing programs such as Bearshare that may include unwanted material in the files

Encrypted site blocking—Provides a deeper layer of protection against access to secure websites that may include inappropriate content, which help prevent children from circumventing the system

Minimum System Requirements

- Apple Computer with Intel Processor
- Mac OS X v. 10.5 or later
- 150 MB Free Drive Space
- 1GB RAM
- Active Internet Connection

What You Want to Do	How McAfee Makes It Possible
Protect your children from objectionable websites	Blocks up to 35 categories of objectionable websites and filters inappropriate content
Manage the amount of time your children spend online	Allows you to manage the amount of time your children spend on the Internet
Make sure your family's personal information remains safe	Records posting of confidential information. Prevents sharing of confidential information and keeps your Mac safe from security threats found in peer-to-peer file sharing
Ensure that your children are having a safe experience online	Activity reports provide you a complete view of all Internet and IM activity and can be used as a tool to teach appropriate online behavior
Know immediately if there is a problem so you can talk to your child	Receive email and/or text alerts instantly when inappropriate website access is attempted

McAfee Family Protection for Mac is designed to provide fast and easy setup so parents can start protecting their children within minutes. It keeps children of all ages safe from exposure to inappropriate content, strangers, and other online threats. With McAfee, kids are free to safely explore, learn, and enjoy their online interests.
