 2 GB RAM for Vista,  
 Windows 7, and Windows 8  
 500 MB free drive space  
 1 GHz processor

**Internet Connection Required**  
 High-speed connection  
 recommended

## Fend Off Viruses and Malware

### **High-performance scanning engine (ENHANCED)**

We built our next-generation scanning engine to guard your PC from the latest viruses, Trojans, spyware, rootkits, and other threats, all without seriously compromising battery life or slowing down your PC.

**Safe searching and shopping (ENHANCED)**—With color-coded icons next to every search result, including popular social networking sites, you'll know if the site you're about to visit is safe.

**Digital data message (ENHANCED)**—We provide information about the location of the blocked IP address and what makes the connection unsafe.

**Home screen**—Got a touch-friendly device? Our new home screen is built for ease of use with these devices. And it still works great with a track pad or mouse, so navigating to common security tasks is a breeze on any device.

**Security reports**—We've redesigned the security report to bring you the information you need in visually interesting ways. The new report includes relevant images and links for an easier-to-understand snapshot of what's going on in the world of security.

**Vulnerability scanner**—If your operating systems (OS) and programs are out of date, you could be vulnerable to threats. The new vulnerability scanner checks your PC for missing updates, and then recommends solutions to keep you safe.

### **Malicious ads and popup protection**

Websites don't always have control over the ads they display. Sometimes, you might find a risky ad on a site you trust every day. McAfee automatically blocks suspect malicious ads to keep you protected.
