

McAfee Internet Security for Mac 2014

Comprehensive Internet security to freely explore the web

We all know that Macs don't get PC viruses, but the Internet is a risky place. Macs are just as vulnerable to Internet threats as PCs. Phishing websites can steal your personal information, and malicious websites can download malware that you might unknowingly spread to your friends. With the daily emergence of new and more sophisticated Internet threats that could disrupt your digital life, you need more than the Mac OS to protect yourself, your computer, your identity, and your family.

McAfee® Internet Security for Mac automatically helps protect your Mac from malware and cyberattacks, and safeguards your personal information from data-stealing programs and would-be hackers. It gives you the freedom to explore, download, and shop on the Internet any time, any place without fear of criminals or cyberattacks. McAfee is the world's largest provider of Internet security and is relentlessly committed to protecting and empowering you on the web.

Website ratings—Adds safety ratings to your browser and search engine results, providing analysis on each website. It annotates each search result with red, yellow, or green ratings to let you know if a website is safe, and it warns you of potential security flaws.

Safe search—Blocks sites with red annotations using the safe search feature so users can't click on bad links.

Blocks phishing sites—Recognizes phishing websites and blocks them by delivering real-time protection.

Anti-spyware—Protects against harmful programs that monitor, collect, and send personal information to cybercriminals.

Email and IM scanning—Scans and cleans attached files received from Apple Mail and iChat programs so you can exchange files freely.

Anti-malware—Protects against viruses, Trojans, worms, bots, and rootkits.

File repair—Repairs and removes infections from files without damaging format or contents.

Firewall protection—Restricts access to and from specific applications communicating via Internet or local area networks.

System Requirements

Mac OS X v 10.7+
Apple computer with
Intel processor
1 GB RAM or higher
150 MB of free drive space
Mozilla Firefox version 4.0
and above

Internet Connection Required

High-speed connection
recommended

The McAfee Advantage

- 30-day free phone support and unlimited email and chat assistance.
- Continuous and automatic updates for the life of your subscription

The screenshot shows a browser window with several search results. Three callout boxes are overlaid on the page, each showing the McAfee SiteAdvisor security rating for a specific website. The callouts are color-coded: yellow for 'Use with caution', red for 'Use with extreme caution', and green for 'No significant problems'. Each callout includes a safety test summary and a 'Read Site Report' link.

Website	McAfee SiteAdvisor Rating	Safety Test Results
www.screensaverfree.com	Yellow (Caution)	Linked to red sites, 50 pop-ups, 2 red downloads
www.screensaverfree.com	Red (Extreme Caution)	Linked to red sites, 50 pop-ups, 2 red downloads
www.screensaverfree.com	Green (Safe)	Linked to red sites, 50 pop-ups, 2 red downloads
