McAfee®
Proven Security™

McAfee® Internet Security Suite

Proven security that protects your digital lifestyle

The PC has become the hub for your digital lifestyle.   You store your digital assets – photos, movies, music, resume, and other valuable documents – on your PC.

You use the Internet for digital communications, including e-mail and instant messaging, and digital transactions, including online shopping and banking. This move to everything digital has created the perfect environment for viruses, spyware, hackers, and spam to threaten your PC, data, and identity.
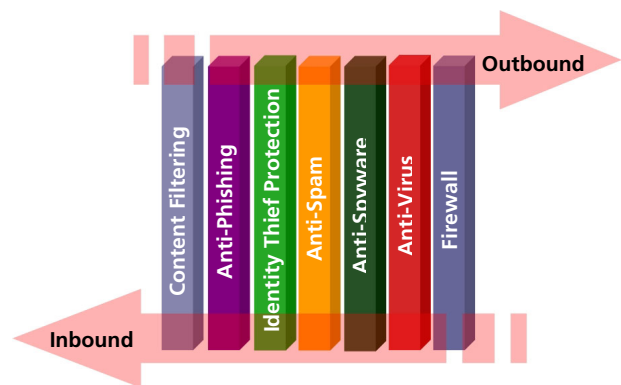

Protect your photos, irreplaceable documents, and financial data

Like many people, you keep important documents and personal information on your computer. Internet Security Suite protects your valuable data by automatically scanning files, e-mail attachments, Internet downloads, and instant message attachments for viruses. Internet Security Suite immediately identifies and removes suspicious items to keep your PC secure.

→ **Detection at multiple entry and exit points**, including e-mail, instant message attachments, Internet downloads, and USB drives.

→ **ScriptStopper™ technology** prevents new, script-based threats like the "I Love You" virus.

→ **Automated, daily signature updates** help keep your PC protected from recently discovered virus, spyware, and 'phishing' threats.

Guard against identity theft and protect your privacy

The Internet has revolutionized the way you communicate, shop, and bank. When you are online, Internet Security Suite guards your private information from hackers, spyware, malicious 'phishing' e-mails, and fraudulent Web sites that threaten your identity and privacy.

McAfee Internet Security Suite provides comprehensive, multi-layered PC security against inbound and outbound Internet threats, including viruses, spyware, hackers, unwanted e-mail, and identity theft.

→ **Automatic spyware detection** identifies, blocks, and removes unwanted programs that jeopardize your privacy or identity.

→ **Permanently erases sensitive personal and financial files** using McAfee® Shredder's secure file erasing features.

McAfee®

Control your e-mail and browsing experience

Spam, pop-ups, and Internet ads get in the way of the things you want to do when you are online. And many of these annoyances can expose you and the people you care about to unwanted and offensive material. With parental controls, spam filtering, and pop-up blockers, Internet Security Suite gives you control over your Internet experience.

→ **Advanced e-mail filtering options** include meta-character, junk-text, invisible text, image, and intentional misspelling filtering.

→ **McAfee AntiPhishing plug-in and custom 'phishing' filter rules** identify and block known and potential 'phishing' websites and scams.

→ **WormStopper™** monitors suspicious mass-mailing behaviors and prevents the spread of viruses to friends, family, and co-workers.

→ **Filters offensive online content**, including websites and newsgroups.

→ **Individual access levels** allow you the flexibility to assign an appropriate level of protection to individual members of your family.

→ **Revitalizes and optimizes PC performance** by removing unwanted programs that utilize system resources, load into memory, or simply occupy hard drive space.

Get the confidence of always-on, always up-to-date security

It's a hassle to keep track of security updates and warnings, but with McAfee you don't have to worry. Our comprehensive, proven products feature automatic updates, and our unmatched security expertise ensures that you always have the latest protection.

→ **Auto-updates run silently in the background**, ensuring you're always protected from the latest virus, spyware, and 'phishing' security threats.

→ **Real people, real help, for free**, our experts are available 24 hours a day, seven days a week via Internet chat at www.mcafeehelp.com.
