

# McAfee® QuickClean™

**The proven solution that that revitalizes your PC**

**Each time you use your PC, you accumulate unwanted programs, registry entries, files and folders.**

Over time, the accumulation of temporary files, altered shortcuts, lost file fragments, and personal information stored in registry files, cookies, and e-mails, consumes valuable disk space and exposes your identity.

## Improve the performance of your PC

When you download files from the Internet, you may also accumulate unnecessary programs, files, and folders that negatively impact your PC's performance. QuickClean removes this unwanted clutter to improve your computer's performance.

- **Revitalizes and optimizes PC performance** by quickly scanning and removing unneeded files, programs and folders, increasing valuable disk space.
- **Proprietary McAfee uninstaller technology** frees you from the time-consuming manual process of file and program removal.
- **Easy-to-use controls** provide convenient program wizards to help create custom cleaning rules and automate everyday cleanup tasks, for example, erasing cached files every time you close your Internet activities.

## Free up valuable disk space

After you uninstall a program, many associated files and folders can still remain on your hard drive. QuickClean's 'application remnant cleaner' (ARC) removes these associated files, including shortcuts and registry entries, restoring valuable disk space.

McAfee QuickClean allows you to effortlessly clean unwanted files, including temporary Internet browser files.

- **Customizable file cleanup** allows you to free up disk space according to personalized criteria, including files that are a certain age, files in certain folders, and files of a certain size.
- **Extensive e-mail cleanup support** including Microsoft® Outlook®, Microsoft Outlook Express®, and other MAPI-compliant e-mail programs.

## Permanently erase sensitive documents and Internet trails

Deleting a file doesn't always remove it completely. Deleted files leave behind a digital footprint that hackers can exploit. The McAfee® Shredder component within QuickClean makes sure this data – especially sensitive files that include personal or financial information - is completely erased.

- **Permanently erases sensitive personal and financial files** using McAfee® Shredder's secure file erasing features.
- **Advanced privacy controls** helps remove confidential information, including your surfing habits and history of files recently accessed by popular Windows® office automation programs, such as Microsoft® Word or Excel.

## Get the confidence of always-on, always up-to-date security

It's a hassle to keep track of security updates and warnings, but with McAfee you don't have to worry. Our comprehensive, proven products feature automatic updates, and our unmatched security expertise ensures that you always have the latest protection.

- **Auto-updates run silently in the background**, ensuring you're always protected from emerging and evolving security threats.
- **Real people, real help, for free**, our experts are available 24 hours a day, seven days a week via Internet chat at [www.mcafeehelp.com](http://www.mcafeehelp.com)
- **30-day money-back guarantee**
