

# McAfee Total Protection™

**Complete, award-winning protection for your PC**

McAfee Total Protection, from Intel Security, provides complete award-winning security for your PC. Ideal for families with a Windows PC in need of one solution providing virus protection, parental controls, a spam filter, and the ability to secure sensitive files stored on the hard drive.

### Top 3 Benefits of McAfee Total Protection:

1. Shield your PC from viruses and online threats
2. Ensure your children have a safe online experience
3. Keep risky email out of your inbox

At McAfee®, we live and breathe digital security, relentlessly working to stay several steps ahead of the latest online threats. Every second of every day we focus on one thing: keeping your digital life safe. Enjoy the benefits of socializing, downloading, and shopping online knowing your PC is shielded from online threats.

### Award-Winning Anti-Virus Protection

McAfee Total Protection leverages the power and threat intelligence of more than 100 Million McAfee customers world-wide to identify, quarantine, and stop the latest threats from harming your PC.

### Parental Controls and Web Safety Tools

McAfee Internet Security includes Parental Controls and Web Safety Tools to help keep the entire family safe when using the computer.

### Anti-Spam

McAfee Total Protection's Anti-Spam feature works with your favorite email client to stop annoying junk mail from cluttering your inbox.

### What's Included in McAfee Total Protection:

Features	What it does	How it protects
<b>McAfee Active Protection™</b>	Detects, quarantines, and blocks viruses, and malware.	If we find something malicious, we isolate it so it can't cause damage to your PC.
<b>Global Threat Intelligence</b>	Deploys real-time protection from the latest threats collected from more than 100 Million McAfee users by an aggregator that combines and categorize threat data into actionable intelligence.	Uses the same reputation database as the Department of Defense by leveraging the latest threat intelligence shared from businesses and personal users.
<b>NetGuard</b>	Two-Way Firewall system monitors and stops traffic in and out of your PC trying to connect to suspicious servers and known botnets.	Prevents hackers from gaining access to your PC and stops cyber criminals from using your PC to spread viruses and online threats.
<b>Network Manager</b>	Monitor your home WiFi network even when you're not home.	Block unknown devices from accessing your WiFi. Remotely monitor your home WiFi to make changes. Prevents others from eavesdropping on your internet usage.
<b>SiteAdvisor®</b>	Identifies URLs as safe, potentially risky, or known to be risky to visit.	Helps you make smarter decisions about what you click, protects you from malicious downloads.
<b>Social Network Protection</b>	Leverages SiteAdvisor® technology to append red, yellow and green icons that indicate whether social media posts from "friends" are safe to click.	Provides a safe way to share shortened links with your social networks, halts navigation to safe sites that have been hacked.
<b>Vulnerability Scanner</b>	Identifies software in need of updating by checking the version on your PC against our database.	Enables you to more easily update your software to patch potential security holes that online threats can exploit.
<b>McAfee® QuickClean™</b>	Deletes unnecessary cookies and temporary internet files that slow down your PC.	Improves your PC's performance.
<b>McAfee® Shredder™</b>	Securely destroys sensitive electronic files.	Deleting files and emptying your PC's recycle bin isn't enough. McAfee Shredder prevents deleted files from being recovered.
<b>Parental Controls</b>	Set time limits on Internet usage, and restrict access to sites.	Ensure your kids have a safe online experience.
<b>Anti-Spam Email Filter</b>	Filters and quarantines unwanted and suspicious emails.	Keeps dangerous emails out of your inbox, and stops annoying junk mail from cluttering your inbox.
<b>File Lock</b>	Uses 256-bit Advanced Encryption Standard (AES) Technology.	Keeps sensitive files protected even if your PC is lost, stolen, or hacked; Helps protect your identity by encrypting highly confidential information.
