

McAfee® Wireless Home Network Security Suite

Proven security that protects your PCs and Wi-Fi® network

While wireless networks are being rapidly adopted in the home, recent research indicates over 60% of wireless networks are unprotected, leaving users vulnerable to identity theft and the loss of irreplaceable documents.

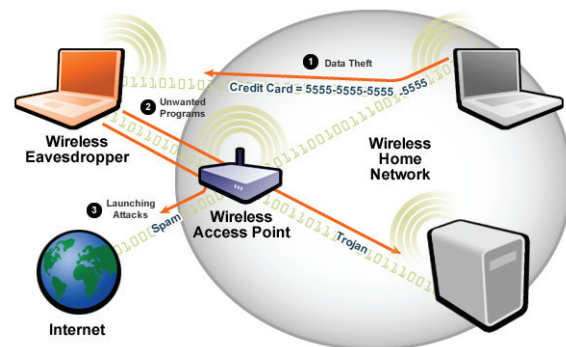

McAfee Wireless Home Network Security Suite is a 3-user license of VirusScan, Personal Firewall Plus, and Wireless Home Network Security – protecting your PCs and home Wi-Fi® network from viruses, spyware, and hackers. The software helps prevent Internet and Wi-Fi threats that can access or damage documents, such as digital photos and personal financial data.

Protect your photos, irreplaceable documents, and financial data

Like many people, you keep important documents and personal information on your computers and send this data over your Wi-Fi network. Wireless Home Network Security Suite protects your valuable information by automatically encrypting your data as it's sent over Wi-Fi, as well as scanning files, attachments, downloads, and instant message attachments for viruses. Wireless Home Network Security Suite immediately identifies and removes suspicious items to keep your PCs secure.

- **Strong automatic encryption** blocks hackers from accessing to your wireless network or capturing data as it travels wirelessly.
- **Scheduled rotation of encryption keys** thwart even the most determined wireless intruders.
- **Detection at multiple entry and exit points**, including e-mail, instant message attachments, Internet downloads, and USB drives.
- **ScriptStopper™ technology** prevents new, script-based threats like the “I Love You” virus.

Vulnerable Wireless Network

Without McAfee Wireless Home Network Security Suite, not only is data sent over Wi-Fi susceptible to theft, but also your wireless network is vulnerable to attack.

McAfee-Protected Wireless Network

McAfee Wireless Home Network Security Suite locks down your wireless router and encrypts the data that each PC sends over the network. This Wi-Fi protection, combined with anti-virus and firewall protection, empowers this 3-user suite to prevent Internet and Wi-Fi threats to your PCs and wireless network.

Simplifies security with one-click interface

McAfee Wireless Home Network Security Suite protects your wireless network and PCs with a single click. You leverage the full strength of built-in security standards without having to make difficult decisions or know any complex technical jargon.

- **Intelligent alerts** notify you instantly of computers trying to join your protected wireless network.
- **Easy access for trusted computers** allows your friends and family to connect to your Wi-Fi.

Guard against identity theft and protect your privacy

The Internet has revolutionized the way you communicate, shop, and bank. When you are online or using your wireless network, Wireless Home Network Security Suite guards your private information from hackers, spyware, and wireless intruders that threaten your identity and privacy.

- **Automatic spyware detection** identifies, blocks, and removes unwanted programs that jeopardize your privacy and identity.
- **Wi-Fi data encryption** protects your personal information from eavesdroppers.

Get the confidence of always-on, always up-to-date security

It's a hassle to keep track of security updates and warnings, but with McAfee you don't have to worry. Our comprehensive, proven products feature automatic updates, and our unmatched security expertise ensures that you always have the latest protection.

- **Auto-updates run silently in the background**, ensuring you're always protected from emerging and evolving security threats.
- **Real people, real help, for free**, our experts are available 24 hours a day, seven days a week via Internet chat at www.mcafeehelp.com
