

# McAfee<sup>®</sup> VirusScan<sup>®</sup> Professional

**Proven security that protects business from viruses, spyware, and spam**

**Digital technologies have revolutionized the way you store important business, financial, and customer information.**

This very revolution has also made this information targets for viruses and spyware to rapidly transmit malicious code from one system to another, jeopardizing confidential business data and customer identities.

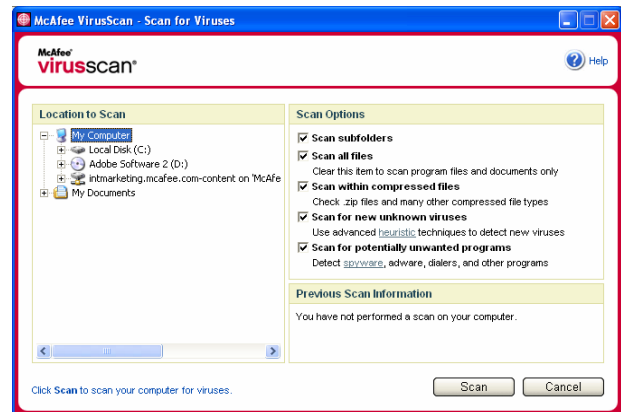

## **Protect business documents and sensitive data**

Like any business, you probably keep important documents and financial information on your computers. VirusScan Professional protects your valuable data by automatically scanning files, e-mails, Internet downloads, and instant message attachments for viruses. VirusScan Professional immediately identifies and removes suspicious files to keep your PCs secure.

- **Detection at multiple entry and exit points**, including e-mail, instant message attachments, Internet downloads, and USB drives.
- **WormStopper™** monitors suspicious mass-mailing behaviors and prevents the spread of viruses to friends, family, and co-workers.
- **ScriptStopper™ technology** prevents new, script-based threats like the "I Love You" virus.
- **2-user license**

## **Remove spying programs and protect customer information**

The Internet has created new ways to steal business information. VirusScan Professional stops spyware that not only jeopardize your personal and business identities, but also slow your computers' performance. VirusScan Professional automatically blocks potentially unwanted programs, such as spyware, that may put you and your business at risk.

**McAfee VirusScan helps prevent viruses and spyware from damaging or compromising irreplaceable documents.**

- **Automatic spyware detection** identifies, blocks, and removes unwanted programs that jeopardize your privacy or identity.
- **Automated, daily signature updates** help keep your PC protected from recently discovered virus and spyware threats.
- **PC optimization and revitalization**

## Prevent unwanted and malicious spam from reaching your inbox

Spam used to be just a nuisance – now it's become a way to steal your personal and financial information. Using advanced filtering techniques, SpamKiller lets you easily block and filter spam from within your existing Microsoft® Outlook® or Microsoft Outlook Express e-mail programs.

- **Advanced filtering options** include meta-character, junk-text, invisible text, image, and intentional misspelling filtering.
- **McAfee AntiPhishing plug-in and custom 'phishing' filter rules** identify and block known and potential 'phishing' websites and scams.

## Permanently erase sensitive documents

McAfee® Shredder component makes sure sensitive files which include personal or financial information are completely erased.

## Get the confidence of always-on, always up-to-date security

It's a hassle to keep track of security updates and warnings, but with McAfee you don't have to worry. Our comprehensive, proven products feature automatic updates, and our unmatched security expertise ensures that you always have the latest protection.

- **Auto-updates run silently in the background**, ensuring you're always protected from the latest virus, spyware, and 'phishing' security threats.
- **Real people, real help, for free**, our experts are available 24 hours a day, seven days a week via Internet chat at [www.mcafeehelp.com](http://www.mcafeehelp.com).
